

Abstract

This invention provides a preparation of traditional Chinese medicinal materials for the treatment of ulcerative colitis and the processed method thereof. The preparation of present invention is prepared from 1-10 wt % of Sanguis Draxonis, 15-40 wt % of Radix Paeoniae Rubra, 1-20 wt % of Indigo Naturalis, 1-10 wt % of Halloysitum Rubrum, 15-40 wt % of Catechu, 1-10 wt % of Calcined Alumen, 5-30 wt % of Rhizoma Bletillae and 1-10 wt % of Calamina. The processed method of the preparation comprises the steps of (a) decocting Radix Paeoniae Rubra, Catechu and Calcined Alumen with water; (b) mixing Indigo Naturalis and Sanguis Draxonis thoroughly, with PEG solution added; (c) mixing the sifted Rhizoma Bletillae, the above-mentioned aqueous decoction and the Indigo Naturalis and Sanguis Draxonis in PEG solution thoroughly, followed by adding Halloysitum Rubrum and Calamina thereto and grinding together, finally the enema is prepared after water being added. The enema of present invention is highly effective in the short- and long-term pharmacological treatment of ulcerative colitis.
